# EDUCATION

# • Indian Institute of Technology Ropar

Bachelor of Engineering in Computer Science; CGPA: 7.06

Punjab, India Aug. 2016 - Present

# • Rajasthan Board of Secondary Education

Maths & Science; 85.8%

Kota, Rajasthan 2016

# Work experience

 Zomato Gurgaon, India SRE Intern May - July 2019

- Maintained and improved SMS Service, designed template based system and added stats using prometheus
- Revamped the entire codebase for easier extension and scaling of the service
- o Designed a dashboard for admin uses using React, PhP and GO
- Learned software engineering patterns and some cool tech stuff

## Projects

### • COMPETITIVE PROGRAMMING PALTFORM

Django, Docker, Redis, Postgres

- CodeArea is a competitive programming platform
- o Designed code editor and judge for submission using python and Docker
- Added priority queue using Celery and Redis

#### • LOCAL AND ONLINE PRICE COMPARISON

Django, Postgres

- Created a web app on which sellers can post there products, maintain multiple shops
- o Users can compare a perticular product's price from different sellers and online store e.g. Amazon

## • MULTIPROCESSOR SIMULATOR

C++

- Created a multiprocessor simulator for a 16-bit simple RISC is a in C++ by executing operations in circular fashion
- Added instruction to simple-RISC for parallelsim, eg. WFE(wait for event), SEV(send event)

## • FLAPPY BIRD AI

Neural Network, SVM, pygame

- o Created flappy bird game using pygame
- Trained gaussian and linear sym for flappy bird game
- Implemented neural network with genetic algorithm for flappy bird

## About Me

- Tech Skills
  - **Programming:** GO, Python, C/C++
  - o Other: Redis, Docker, Sql, git, Linux, VIM
- Awards & Honors
  - Won hackathon at Advitiya IIT Ropar Tech Fest
  - Got selected for KVPY scholarship

# MOOCS

- Coursera: Algorithmic Toolbox
- Coursera: Neural Networks and Deep Learning, Improving Deep Neural Networks
